1968, page 606, right hand column – In the Figure, the log K_A values for alkali metal picrates are plotted against pK_a = 1·95 instead of the correct value for picric acid, pK_a = 0·71. The negative differences of the log K_A values of picrates compared to hydroxycarboxylates are now reduced to 0·6 (K), 0·7 (Na), and 0·8 (Li). The conclusions drawn remain unchanged by this correction –.
